

Plumstead Dental Surgery

Facial Aesthetics

At Plumstead Dental Surgery we offer a number of non-surgical treatments which can help you achieve a more youthful appearance in a short timeframe. If you would like more information regarding our treatments or to check your suitability for these treatments, please ask a member of our team.

WHAT CAN PDS DO FOR YOU?

We offer treatments that are ideal for those who are looking for non-permanent, quick results, fast. These treatments are ideally suited for use on moderate to severe frown lines between the eyebrows and crow's feet.

With our treatments you may begin to notice results within 24-48 hours with results lasting up to 4 months.

DERMAL FILLERS

Dermal fillers are a popular non-permanent and non-invasive treatment for wrinkles and facial lines. This procedure helps to 'fill out' and smooth away problem areas such as:

Nose and mouth grooves;
Frown lines;
Acne pits;
Crow's feet;
Aging hands;
Aging Décolletage (neck and chest);
Forehead lines.

Dermal fillers are especially effective when used to increase volume in the lips, while maintaining a very natural look.
